About

Computer Science and Engineering student with a passion for Software development using programming languages like C++, Java and some web technologies like HTML, CSS and JavaScript. I possess a strong foundation in Data Structures and Algorithms (DSA), having solved over 200 problems on platforms like GeeksforGeeks and Leetcode. My background in front-end development, with proficiency in HTML, CSS, JavaScript, and React.js, allows me to craft user-friendly interfaces. I am actively seeking opportunities to leverage my skills, contribute to real-world projects, and collaborate with talented developers.
